My site URL https://www.decencyfastlink.com

I want to build a site like https://www.jiji.ng

  I need an experienced WordPress expert to help in customizing the classified listing plugin I am using.

 The expert should be able to add extra fields to the plugin as well as create extra features.

 Special emphasis should be made on

- A search bar
- Category appearance
- Location based search

The homepage must have similar appearance like https:// jiji.ng
